

Project Timelines

2023 Exploration

- On-site exploration
- Identify drill targets

2024 Resource Estimate

- Leverage assays to identify maiden resources

2025 Definition Drilling

- 3,000m diamond drill program
- Targetted prospective zones

2023 Drilling

- est. 3,500m diamond drill program
- Permitting and planning

2024 Engineering

- Complete technical reports and begin permit requirements for Lithium production

2026 - 2028

Lithium Production

Final Frontier Project

FRONTIER LITHIUM:
\$467M MARKET CAP

PENNOCK PEGMATITE

- Traced for 1.5km with a 30x16m "Blowout"
- 16m channel averaging 1.96% Li₂O

SPARK PEGMATITE

- 5,769m in 20 drill holes plus 342m of surface channeling
- 14.4 MT of 1.40% Li₂O Indicated
- 18.1 MT of 1.37% Li₂O Inferred

BOLT PEGMATITE

- Traced for 600m with widths in excess of 50m
- 36.4m channel averaging 1.51% Li₂O

PAK PEGMATITE

- 7,528m in 40 drill holes plus 216m of surface channeling
- 7.23 MT of 1.87% Li₂O Measured + Indicated
- 2.76 MT of 2.22% Li₂O Inferred
